

Hotel Management System

ABSTRACT

Hotel management system is developed following system development stages for smooth running and management of hotel. After an information gathering from several hotels managed by manual and computerized systems, the system analyst saw that the hotel indeed needed a computerized management system.

After a close analysis of samples collected during the problem definition stage the analyst found that all the hardware and software requirements needed for implementation and maintenance of the system are readily available in the market and cheaply affordable by the hotel. The system is to be carefully designed to ensure maximum efficiency of the system at the hotel. The system will be skillfully and carefully coded to seal any possible loopholes in the system.

The system was developed using visual basic for applications language. This system will indeed help the hotel management and the esteemed staff members to manage and steer the hotel's functionality and transactions to realize its maximum potential in addition to its competence in the business field.
